BOOK SYNOPSIS

Students become experts and innovators through Concept-Based teaching. Innovators don't invent without understanding how the world works. With this foundation, they apply conceptual understanding to solve problems. We want students to not only retain ideas, but relate them to other things they encounter, using each new situation to add nuance and sophistication to their thinking. Discover how to help learners uncover conceptual relationships and transfer them to new situations. Teachers will learn: Strategies for introducing conceptual learning to students, Four lesson frameworks to help students uncover conceptual relationships, How to assess conceptual understanding, and How to differentiate concept-based instruction.
